

# Spotlight Capital Holdings Announces Rim Ryderz Patented New Skateboard Wheels

Thu January 31, 2019 10:26 AM|GlobeNewswire|About: [SLCH](#)

Los Angeles, CA, Jan. 31, 2019 (GLOBE NEWSWIRE) -- via NEWMEDIAWIRE -- Spotlight Capital Holdings Inc. ([SLCH](#)) proudly announces that its new partner Rim Ryderz, the innovative skateboard company, has developed a patented core system for its skateboard wheels. The look is amazing and so is the ride. Rim Ryderz's wheels are 70mm. made with a 78A urethane for durability and engineered to lock into place with a key, making it easy to interchange rims on the fly. The design was created with an inner bearing housing function that pushes away from the rim and equalizes the pressure from the rider amongst wheels allowing for a stable and smooth skateboard ride. The President of Rim Ryderz, Mr. Longino, who created the design of the new patented wheels, wanted this company to customize skateboards down to the rims, which differentiates this company from its competitors. After years of multiple designs, years of research and development, Rim Ryderz has earned its unique place in the skateboard industry, by creating high performance boards and wheels that the consumer can swap out as the mood hits.

This Company has evolved from years of R&D, which will benefit the consumers of skateboards. When a person purchases a board from Rim Ryderz, the consumer will be able to choose a kit style to create his or her own custom look to the board and the wheels, for a high performing and attractive skateboard that will reflect the purchaser's unique style. There is nothing like this on the market. Rim Ryderz boards and wheels are currently in production and will be available in 15 different designs; this product will be available in retail outlets soon. Spotlight Capital Holdings, Inc. is excited to be in business with a company that will be a leader in the skateboard industry and a very profitable addition to the Spotlight family and its shareholders.
